Description

Policy for WEEE

Policy of Damm Cellular Systems A/S for WEEE

**Directives of the European parliament and of the council 2002/96/EF and 2003/108/EF
regarding waste of electrical and electronic equipment.
Danish legislation Law 385 25/05/2005 and Legal Notice 664 27/06/2005**

Legally coming into force

Legislation within the area is to come into force on 1st April 2006 regulated by the legal notice no. 664 27/06/2005 about handling of waste of electrical and electronic equipment.
Damm Cellular Systems A/S observes Danish legislation within the area.

The scope of WEE

The regulations of the directive comprise handling of household waste of electrical and electronic equipment and waste of other electrical and electronic equipment, amongst others IT and telecommunication equipment and products for the purpose of transmission of sound, pictures or other information by means of telecommunication.

Damm Cellular Systems A/S will not be registered in manufacturer registers in countries within the EU except from Denmark.

The policy of Damm Cellular Systems A/S within the area

Export

Products in OEM and DAMM brand/label

According to the directive, article 3, item i) section ii) and section iii) the OEM customer or distributor, which imports, deal in and resell products from Damm Cellular Systems A/S under own brand or in DAMM brand, are to be considered as the manufacturer and therefore bear the responsibility for observing the WEEE according to local legislation.

The products are basically not taken back as a part of WEEE about disposal of waste of other electrical and electronic equipment acc. to the above.

If a OEM customer or distributor may wish Damm Cellular Systems A/S to take back the products as part of WEEE about disposal of waste of other electrical and electronic equipment this may be agreed. In this case all costs in connection with the return shipment are irrelevant to Damm Cellular Systems A/S.

Damm Cellular Systems A/S dispose of the products/waste returned of other electrical and electronic equipment in Denmark according to legislation and controlled by the Danish Authorities.

Collection and disposal of waste of other electrical and electronic equipment, which is market and sold before the Act coming into force (historical WEEE), is irrelevant to Damm Cellular Systems A/S.

Denmark

Products in DAMM brand/label

The products, which are sold and market in DAMM brand/label are taken back as a part of WEEE about disposal of waste of other electrical and electronic equipment acc. to the above.

All costs in connection with the return shipment are irrelevant to Damm Cellular Systems A/S.

Damm Cellular Systems A/S dispose of the products/waste returned of other electrical and electronic equipment in Denmark according to legislation and controlled by the Danish Authorities.

Collection and disposal of waste of other electrical and electronic equipment, which is market and sold before the Act coming into force (historical WEEE), is irrelevant to Damm Cellular Systems A/S.

Products in OEM brand/label

The products, which are sold and market in OEM brand/label are handled as described under *Export*.

Information and labeling obligation

Products, which are market after 13th August 2005, shall be marked with pictorial marking according to WEEE legislation.

Damm Cellular Systems A/S shall according to demand provide requisite and legal reuse and handling information for each new type of product which come on the market latest 1 year after the equipment's first marketing date valid as from the WEEE legislation coming into force.
